Mayank Poojary

Summary

Full Stack Developer passionate about building intuitive and scalable web applications using **React, Next.js, Node.js, and Appwrite**. I have experience in **API development, database management, and UI/UX design**, with a strong foundation in **JavaScript, Python, and SQL**. I love working on real-world projects, from **finance tracking to delivery rescheduling platforms**, and enjoy participating in hackathons to solve complex problems creatively.

Education

Fr. Agnel Polytechnic Vashi

AI & ML

August 2023 - May 2026

Diploma

Ryan International School [CBSE]

SSC-10th

2013-2023

School

Projects

Aura Manufacturing

AI Powered Manufacturing Management System

Mar 2026 - Apr 2026

Developed a smart manufacturing management platform focused on improving operational efficiency and production monitoring. The system enables real time tracking of manufacturing workflows, inventory management, and production analytics through an intuitive dashboard. Integrated AI driven insights to help optimize processes, reduce delays, and support data driven decision making. This project strengthened my skills in full stack development, dashboard design, and building scalable business solutions.

Finora

AI Personal Finance Platform

Dec 2026 - Jan 2026

Built a full-stack personal finance platform designed to help users manage expenses, income, savings, and budgeting efficiently. Finora features real-time transaction tracking, automated expense categorization, budgeting tools, and savings goal monitoring. Integrated an AI-powered chatbot that provides personalized financial guidance, budgeting suggestions, and financial insights. This project enhanced my experience in full-stack development, financial data handling, and AI integration for user-centric applications.

Skills

Frontend Development

React.js, Next.js 13, JavaScript, TypeScript, Tailwind CSS, UI/UX basics

Backend Development

Node.js, RESTful API development, authentication, authorization

Databases & Cloud

Supabase, Appwrite, MongoDB, Firebase, real-time data syncing, data modeling, CRUD operations

Certifications

Python

Udemy

March 2024
